

B1

with respect to various such items evoking through self-identifying thereof associated specific iconizing by the host for signaling to a user an associated and selective information processing and/or entertainment oriented service field, furthermore so allowing by the host a user person to activate information processing operations with respect to the selective service field,

having each item so keeping abreast of host-generated results during such proximity conditions as being relevant to its associated field,

whilst allowing free styling of such item with respect to physical shape requirements thereto.

The evoking of a specific icon on the host screen is token for an allowable interactivity, and the storing of appropriate processing results in the item allows a user to discontinue a session, whilst still being able to later resume at an interaction point that is deemed relevant. The free-styling of the items makes recognizing easier for little children and other categories of people.

IN THE CLAIMS

Please cancel Claims 1-3 without prejudice.

Please add Claims 4-15 as follows:

- B2
4. (New) A multimedia method for use with a screen-based host system provided with information processing and I/O facilities, and for interacting with an item, said method comprising:
